

The following appendix displays the crosstabulation tables should readers wish to conduct a closer analysis of subgroups for a given question. These crosstabulation tables provide detailed information on the responses to each question by all demographic groups that were assessed in the survey.

	1. How many years have you lived in the City of Mountain View?							
	Total	1 year or less	2 to 3 years	4 to 5 years	6 to 9 years	10 to 15 years	16 to 25 years	26 years or more
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.67	3.66	3.65	3.53	3.54	3.63	3.64
5. Generally speaking,	3.46	3.55	3.59	3.51	3.30	3.32	3.38	3.41

	A. Do you own or rent your place of residence?			
	Total	Own	Rent	Other
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.71	3.55	3.89
5. Generally speaking,	3.46	3.44	3.47	3.54

Comparisons of Column Means<sup>a,b</sup>

	1. How many years have you lived in the City of Mountain View?							A. Do you own or rent your place of residence?		
	1 year or less	2 to 3 years	4 to 5 years	6 to 9 years	10 to 15 years	16 to 25 years	26 years or more	Own	Rent	Other
	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(A)	(B)	(C)
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?								B		
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?										

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	B. Which of the following best describes your working status?								
	Total	Full-time	Part-time	Self-employed	Unemployed	Homemaker	Retired	Student	Refused/preferred not to say
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.67	3.56	3.53	3.65	3.59	3.70	3.56	3.08
5. Generally speaking,	3.46	3.46	3.57	3.41	3.44	3.38	3.39	3.52	3.48

Comparisons of Column Means<sup>a,b</sup>

	B. Which of the following best describes your working status?							
	Full-time	Part-time	Self-employed	Unemployed	Homemaker	Retired	Student	Refused/preferred not to say
	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?								
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?								

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	C. What is your age?							
	Total	17 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 49 years	50 to 59 years	60 years and up
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.68	3.67	3.77	3.53	3.53	3.64	3.58
5. Generally speaking,	3.46	3.66	3.51	3.60	3.45	3.33	3.41	3.33

	D. How many children under the age of 17 are living at your home?				
	Total	One	Two or more	None	Don't know/ No Answer
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.61	3.62	3.63	3.58
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?	3.46	3.36	3.56	3.47	3.17

Comparisons of Column Means<sup>a,b</sup>

	C. What is your age?							D. How many children under the age of 17 are living at your home?	
	17 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 49 years	50 to 59 years	60 years and up	One	Two or more
	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(A)	(B)
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?									
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?									

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

Comparisons of Column Means<sup>a,b</sup>

	D. How many children under the age of 17 are living at your home?	
	None	Don't know/ No Answer
	(C)	(D)
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?		
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	E. Which category best describes your total household income before taxes in 2005?								
	Total	Under \$20,000	\$20,000 to \$40,000	\$40,000 to \$60,000	\$60,000 to \$80,000	\$80,000 to \$100,000	\$100,000 to \$120,000	\$120,000 or more	DK/ NA/ Refused
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.21	3.61	3.77	3.80	3.58	3.56	3.75	3.59
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?	3.46	3.27	3.50	3.49	3.55	3.52	3.42	3.53	3.33

Comparisons of Column Means<sup>a,b</sup>

	E. Which category best describes your total household income before taxes in 2005?							
	Under \$20,000	\$20,000 to \$40,000	\$40,000 to \$60,000	\$60,000 to \$80,000	\$80,000 to \$100,000	\$100,000 to \$120,000	\$120,000 or more	DK/ NA/ Refused
	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?		A	A	A			A	A
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?								

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	F. What is the last grade or level you completed in school?					
	Total	High School Graduate or less	Technical School or Some College	College Graduate	Graduate/ Professional degree	Don't know/ No Answer
2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.59	3.56	3.68	3.63	3.65
5. Generally speaking, are you satisfied or dissatisfied with the job the City of Mountain View is doing to provide city services?	3.46	3.53	3.55	3.46	3.38	3.61

	G. What ethnic group do you consider yourself a part of or identify with?					H. Gender		
	Total	Caucasian/ White	Asian-American	Latino(a)/ Hispanic	Other	Total	Male	Female
	2. Generally speaking, are you satisfied or dissatisfied with the quality of life in Mountain View?	3.63	3.70	3.61	3.51	3.55	3.63	3.64

	The City needs more stores		a
	Other		
Don't know/ No answer		A B	

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

Comparisons of Column Proportions<sup>b,c</sup>

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

		(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)
3. In your opinion, what are the top issues facing the City of Mountain View?	Better management of the tax revenue and the city budget			a		a	a		a
	The City needs more stores		a	a	A	a		a	a
	Don't know/ No answer		A						

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Improvements in road conditions			.		.		.	.
	Better management of the tax revenue and the city budget	.				.		.	.
	The City needs more stores				.	.		.	.
	Other					.		.	.
Don't know/ No answer					.		.	.	

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

Comparisons of Column Proportions<sup>b,c</sup>

		G. What ethnic	H. Gender	
		Other	Male	Female
		(D)	(A)	(B)
3. In your opinion, what are the top issues facing the City of Mountain View? Please name up to two issues.	Increasing the availability of affordable housing			
	Improving local schools			
	Reducing crime			A
	Reducing traffic on local streets			
	Illegal immigration			
	Poverty and unemployment		B	
	Energy crisis			
	Overpopulation			
	Over-construction and over-development			
	Improving the downtown area			
	Maintaining a clean environment and beautification of the City			
	Improving public transportation in the area			A
	Building new recreation and park facilities	.		
	Improvements in road conditions	.		
	Better management of the tax revenue and the city budget	.		
	The City needs more stores	.		
	Other			
Don't know/ No answer				

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

Comparisons of Column Proportions<sup>b,c</sup>

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	1. How many years have you lived in the City of Mountain View?							
	Total	1 year or less	2 to 3 years	4 to 5 years	6 to 9 years	10 to 15 years	16 to 25 years	26 years or more

Don't Know/No answer	<sup>a</sup>	<sup>a</sup>			

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Don't Know/No answer	a	

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Don't Know/No answer				

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. This category is not used in comparisons because the sum of case weights is less than two.
- c. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- d. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Don't Know/No answer			A B C

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. This category is not used in comparisons because the sum of case weights is less than two.
- c. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

**Comparisons of Column Proportions<sup>c,d</sup>**

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

d. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

		E. I am going to read some income categories. Please stop me when I reach the category that best describes your total household income before taxes in 2005.

Don't Know/No answer		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Other			a	a		a		a
	Don't Know/No answer						G		

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

22. In your opinion, is it generally safe to walk across major intersections in Mountain View?	Yes No Don't Know/No Answer	a	a	B	A

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. This category is not used in comparisons because the sum of case weights is less than two.
- c. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- d. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

27B. At night	2.99	2.80	2.84	3.07	2.79

Comparisons of Column Means<sup>a,b</sup>

	C. What is your age?							D. How many children under the age of 17 are	
	17 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 49 years	50 to 59 years	60 years and up	One	Two or more
	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(A)	(B)
27A. During the day		A						B	
27B. At night									

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

Comparisons of Column Means<sup>a,b</sup>

	D. How many children under the age of 17 are	
	None	Don't know/No Answer
	(C)	(D)
27A. During the day	B	
27B. At night		

Results are based on two-sided tests assuming equal variances with significance level 0.05. For each significant pair, the key of the smaller category appears under the category with larger mean.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.

	E. I am going to read some income categories. Please stop me when I reach the category that best describes your total household income before taxes in 2005.

	No							B			
	DK/NA		.				.			.	

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

	Don't Know/No Answer	.a		.a

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. This category is not used in comparisons because the sum of case weights is less than two.
- c. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- d. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Comparisons of Column Proportions<sup>b,c</sup>

		1. How many years have you lived in the City of Mountain View?							A. Do you own or rent your place of residence?
		1 year or less (A)	2 to 3 years (B)	4 to 5 years (C)	6 to 9 years (D)	10 to 15 years (E)	16 to 25 years (F)	26 years or more (G)	Own (A)
B. Which of the following best describes your working status?	Full-time	G	F	G					
	Part-time								
	Self-employed				A	B		B	
	Unemployed				a				
	Homemaker								
	Retired		G	A				B	
	Student				a				
	Refused/prefer not to say				a				

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

Comparisons of Column Proportions<sup>b,c</sup>

		A. Do you own or rent your place of residence?	
		Rent (B)	Other (C)
B. Which of the following best describes your working status?	Full-time		
	Part-time		a
	Self-employed		a
	Unemployed		A
	Homemaker		a
	Retired		
	Student		a
Refused/prefer not to say		A	

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.
- b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

- a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
- b. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

		F. What is the last grade or level you completed in school?					
		Total	High School Graduate or less	Technical School or Some College	College Graduate	Graduate/ Professional degree	Don't know/ No Answer
H. Gender	Total	423	74	64	121	159	7
	Male	222	36	36	55	92	3
	Female	201	38	27	65	67	4
		52.5%	49.0%	56.8%	45.8%	57.9%	40.2%
		47.5%	51.0%	43.2%	54.2%	42.1%	59.8%

		G. What ethnic group do you consider yourself a part of or identify with?				
		Total	Caucasian/ White	Asian- American	Latino(a)/ Hispanic	Other
Total		423	215	71	69	69
H. Gender	Male	222 52.5%	107 49.8%	40 55.9%	39 56.3%	37 53.4%
	Female	201 47.5%	108 50.2%	31 44.1%	30 43.7%	32 46.6%
