# Zero Waste Plan Workshop

The City of Mountain View is developing a Zero Waste Plan to identify the policies, programs and infrastructure needed to achieve the City's goal of 90% waste reduction and recycling by 2030.

Please join us on March 4, 2019 at 6:30 at the Historic Adobe Building to provide input on the City's plan. We will discuss:

- Results from the City's recent materials composition study that identifies what's in our trash that can be reused, recycled or composted
- Progress that the City has made towards its goal by achieving 78% recycling in 2017
- Ideas for new or expanded policies and programs and regional efforts in waste prevention, recycling and composting

Light refreshments will be served. This is a Zero Waste event - please bring your own reusable beverage container.

Help lead us - and all of Mountain View - toward a future with Zero Waste.

*Zero Waste is the conservation of all resources by means of responsible production, consumption, reuse, and recovery of products, packaging, and materials without burning, and with no discharges to land, water, or air that threaten the environment or human health.*
